

Thematic Panel on Political Economy of the Territory

Call for Communications

The Thematic Section of Political Economy of the Territory seeks to organise one or more thematic panels focusing on issues concerning the relations between political economy and territory, namely on how the latter contributes to shaping socio-economic fabrics in specific territorial contexts.

Similarly to what has happened in recent years, we invite you to submit proposals which address the themes of the 6th Annual Political Economy Meeting from the point of view of their spatial-territorial and geographical settings and their respective incidences. The focus of the 6th Annual Political Economy Meeting has a strong territorial dimension, namely regarding asymmetries, globalisation and de-globalisation dynamics, territorial vulnerabilities and responses, and depopulation and environmental risks.

Communication proposals, to be presented as established in the Call for Communications for the 6th Meeting, should be sent to Paulo Madeira (paulo.madeira@ics.ulisboa.pt) and Pedro Marques (p.marques@ingenio.upv.es) until the 23rd of September, with the subject "6th EcPol Meeting - thematic panel on Political Economy of the Territory".
